EXPERIENCE & PROJECTS

SHOPPING WEB APP WITH BACK-END ADMIN PANEL

- This app is built with NODEJS on ExpressJS Framework.
- Each user can add, delete or edit his product. Data is stored in MongoDB database.
- Authentication & validation. Notify users through email while signup and resetting passwords using third-party Nodemailer Service.
- Authorization to each user so that only valid users can perform admin-related tasks.
- Protection again Cross Site Attacks using CSRF Protection. CSRF tokens are included in each admin related requests like login signup add edit delete add-cart.
- Proper Error Handling through Middleware so that for every critical error app displays 500 error page instead of crashing.
- Add to Cart, Order page & Stripe Payment. Each user can also download INVOICE for related order.
- Async request to server & DOM manipulation for deleting product so that page doesn't reload while deleting a product.
- Pagination is also included for displaying all products.

BLOG WEBSITE - REACTJS

- This project is built on ReactJS.
- Add blog with author details & delete it.
- Each new blog is stored and fetched on a JSON file.
- Blog detail page for each blog.

Weather APP THROUGH API FETCHING

- User can get current weather for city.
- Weather data is get though API fetching from third party AcuWeather service.
- Weather data is also stored so that user can get data of last added city during page reload.

Beside that there also some other projects & Javascript related tasks. Visit my portfolio website to see my all projects.
